## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1 and 4-6 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to show or teach a light emitting diode device comprising a substrate, a lower reflection film, a LED, a resin layer encapsulating the LED, a upper reflection layer wherein the layer is formed by metal and can transmit a portion of the light rays, and light ray which are reflected in the forward direction and the side wall, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suehiro et al. (US Publication 2006/0119250) and Mizobe (US Patent 5,249,104) both teach a light emitting diode device comprising a substrate, a lower reflection film, a LED, a resin layer encapsulating the LED, a upper reflection layer wherein the layer is formed by metal and can transmit a portion of the light rays.
